Allowable Subject Matter

1. Claims 10-18, and 34-42 are allowed.

In accordance with the Board's Decision of 1/24/06, the prior art fails to address the limitation of claims which "...process the first type of frame using a first error resilience technique and the second type of frame using a second error resilience technique, wherein the first error resilience technique comprises applying resynchronization markers to the video stream at a selected interval and the second error resilience technique comprises applying resynchronization markers at an interval different from the selected interval such that the second error resilience technique replaces a bit pattern for the second type of frame with a bit pattern of shorter length..." thus this limitation of independent claims 10 and 34 distinguish over the art of record. Dependent claims 11-18, and 35-42 are allowed for the reasons concerning the independent claim.

Conclusion
